

Connector Motor Hub

The Connector Hub brings automated capabilities to remote control motorized shades. Hubs operate through your wi-fi network and allow shade operation through smart phones and select smart home technologies.

Capabilities

- Control up to 30 devices per connector
- Create up to 20 scenes
- Set up to 30 timers on scenes or devices
- Add up to 5 sub-users
- Add up to 3 Connector Hubs per location

Operation + Home Automation

- Operation and set up through smart phone devices on the Connector+ app
- Voice command through the IFTTT app on Google Home and Alexa Devices
