Activate Pairing Mode

BEEP X1

Sleep Mode

JOG X2 BEEP X2

Reverse Direction

JOG X3 BEEP X3

Reset To Factory Settings

JOG X4 BEEP X4

Hold P1

P1

NOTE

Reverse motor direction from P1 button only when motor does not have any limits.

INITIAL SET-UP

Pair motor with controller

Select channel on controller.

Hold P1 button on motor head

Hold STOP on controller.

Motor is now in step mode and ready for setting limits

Check motor direction

To check travel direction of shade, press **UP** or **DOWN** on controller.

IMPORTANT

Reversing motor direction using this method is only possible during initial set-up.

To reverse shade direction, hold both **UP** and **DOWN**.

Until the motor responds

IMPORTANT

Damage to shade may occur when operating motor prior to setting limits. Attention should be given.

Set limits

Move shade to the desired highest or lowest position by pressing the **UP** or **DOWN** buttons on controller.

To save upper limit, hold **UP** and **STOP**

To save lower limit, hold **DOWN** and **STOP**

Initial set-up is now complete

ADJUSTING LIMITS

Adjust upper limit

Hold **UP** and **STOP** on controller.

Move shade to the desired highest position by pressing the **UP** button.

To save upper limit, hold **UP** and **STOP**.

Adjust lower limit

Hold **DOWN** and **STOP** on controller.

Move shade to the desired lowest position by pressing the **DOWN** button.

To save lower limit, hold **DOWN** and **STOP**.

ADJUSTING MOTOR SPEED

Increase or decrease motor speed

To adjust motor speed, follow these three steps for each level of speed adjustment. There are three speeds available

Press **P2** on controller.

To increase speed.

Press **UP**.

Press **UP**.

To decrease speed.

Press **DOWN**.

Press **DOWN**.

If motor does not react to speed adjustment, the maximum or minimum speed has already been reached.

ADDING OR REMOVING CONTROLLERS AND CHANNELS

Using motor P1 button

Hold **P1** button on motor head

Hold **STOP** on controller to add or remove

Using a pre-existing controller

A= Existing controller or channel (to keep)

B= Controller or channel to add or remove

Press **P2** on existing controller.

Press **P2** on existing controller.

Press **P2** on new controller.

FAVORITE POSITIONING

Set a favorite position

Move shade to the desired position by pressing the **UP** or **DOWN** button on the controller

Press **P2** on controller.

Press **STOP** on controller.

Press **STOP** on controller.

Send shade to favorite position

Hold **STOP** on controller

Delete favorite position

Press **P2** on controller.

Press **STOP** on controller.

Press **STOP** on controller.

TILT & ROLLER MODE

Enter tilt mode

For slat adjustment on venetians

Hold **UP** and **DOWN** on controller

Press **STOP**

Enter roller mode (Default)

Hold **UP** and **DOWN** on controller.

Press **STOP**.

SLEEP MODE

Enter Sleep Mode

Sleep mode is utilized to prevent a motor from moving during shipping of a fabricated shade

Hold **P1** button on the motor head

Exit Sleep Mode

Exit sleep mode once the shade is installed

Hold **P1** button on the motor head

TROUBLESHOOTING

Problem	Cause	Remedy
Motor is not responding	Battery depleted	Replace or re-charge battery
	A/C power supply not plugged in.	Check power and connections
	Transmitter battery discharged	Replace battery
	Transmitter battery inserted incorrectly	Check battery polarity
	Radio interference/shielding	Keep transmitter away from metal objects and make sure antenna on motor is straight and away from metal
	Receiver distance is too far from transmitter	Move transmitter closer
	Power failure	Check power and power supply
Motor beeps 10 times when in use	Battery voltage is low.	Replace batteries in battery wand -OR- Recharge rechargeable battery pack.
		Always reserve an individual channel for programming functions
Cannot program a single Motor (multiple motors respond)	Multiple motors are paired to the same channel.	SYSTEM BEST PRACTICE - Provide an extra 15 channel controller in your multi motor projects, that provides individual control for each motor for programming purposes
		Place all other motors into sleep mode
